

City of Clarksville Prescription Drug Program – 2019 Express Scripts

- Coverage is automatic when coverage begins in the city’s medical plan.
- Prescriptions may be filled at any drugstore.

When purchases are made at the drugstore, your co-pays for up to a 30-day supply are:

Generic 30-day supply	Formulary alternative 30-day supply	Non-formulary 30-day supply
\$15.00	\$30.00	\$55.00

You may purchase the same medication and dosage at the drugstore three times. The medication must then be purchased through the mail-order program in 90-day supplies. Your co-pays through this program are:

Generic 90-day supply	Formulary alternative 90-day supply	Non-formulary 90-day supply
\$20.00	\$40.00	\$70.00

When your physician prescribes a maintenance medication that you will be taking over a long period of time, request that the physician write a prescription for 30 days that you can fill at the drugstore. The physician will also need to write a separate prescription for the same medication to be filled in a 90-day supply with 3 refills.
